Experience

MuxApps | Lahore, Pakistan
Full Stack Developer
07/2025 - Current

MuxApps — Full Stack Developer

Worked on multiple production web applications across healthcare, logistics, and social platforms, contributing to frontend, backend, and UI development.

- Developed full-stack features for healthcare, logistics, and social platforms, enhancing user engagement and functionality.
- Built responsive and user-friendly interfaces using React, Tailwind CSS, and Laravel Blade templates.
- Implemented REST API integrations and backend logic to support appointment booking, delivery tracking, and social interaction features.
- Developed secure authentication, session handling, and data management systems for production applications.
- Improved application performance, scalability, and maintainability through clean code and modular architecture.
- Collaborated with cross-functional teams to deliver applications from design to deployment, ensuring alignment with user needs and project goals.

Digitek Vista | Lahore, Pakistan
Laravel Developer
09/2025 - 11/2025

Digitek Vista - Laravel Developer

- Developed tools and features in a Laravel application, integrating APIs and implementing complex business logic.
- Built responsive interfaces and functional components for improved user experience.
- Implemented backend functionality, database operations, and secure data handling to support real-world application requirements.

Vaultifier | Lahore, Pakistan
Full Stack Developer
10/2024 - 01/2025

Vaultifier - Full Stack Developer

Developed a production-level application using Next.js, Tailwind CSS, JavaScript, and TypeScript. Designed and consumed RESTful APIs, implemented robust security/authentication systems, and applied modern encryption techniques. Contributed to responsive UI, backend integrations, and performance optimization.

- Developed responsive web applications leveraging JavaScript frameworks and RESTful APIs to enhance functionality and user engagement.
- Collaborated with designers to create intuitive interfaces, enhancing user experience and accessibility across applications.
- Implemented backend services using Node.js, integrating with database systems to support seamless data management and retrieval.
